

Agru mix

ESSENTIALS OILS

PLANT EXTRACTS

Main features:

AGRU MIX is a plant extract that supports plants during the intense development and production phases, improving their resistance and productive capacity. Its regular foliar application allows for maximizing yields and can be used in combination with biostimulant substances to enhance their effectiveness.

Mechanism of action

AGRU MIX works by stimulating the physiological processes of plants, improving their ability to adapt to environmental stresses and promoting balanced growth. Optimizes natural defenses and supports the production of volatile compounds useful for communication and plant protection.

COMPOSITION

Essential oils

C.P CHARACTERISTICS

pH 8.50 +/- 0.5
Density..... 1.00 +/- 0.5
Color Green
Smell Citrusy
Solubility..... Completed

FORMULATION

Dense liquid

CLASSIFICATION

No one

PACKAGING

Bottle..... 1 L
Tank..... 5 L
Tank..... 10 L

APPLICATION

INSTRUCTIONS FOR USE

- Horticultural crops in open field and greenhouse: 200-400 ml/hl
 - Nursery (plants in container): 200-400 ml/hl
 - Fresh-cut salads: 200-400 ml/hl
 - Strawberries: 400-500 ml/hl
 - Fresh herbs and aromatic: 200-300 ml/hl
 - Flowers and ornamentals: 200-300 ml/hl
 - Fruit [pome fruits (apple, pear etc), stone fruit (apricot, peach, cherry, etc.), Actinidia (kiwi)]: 300-600 ml/hl
 - Grapes: 500-700 ml/hl using about 300 L of water
 - Olive: 400-600 ml/hl using high volumes of water (1000-1500)
-
- Shake well before use
 - Apply the product evenly
 - Avoid use during the hottest hours of the day
 - It is recommended to reapply the product in case of precipitation if it is applied by spraying
 - Suspend treatments at certain phenological stages
 - It is advisable to test some plants for varietal tests before treating the whole surface
 - Application on dry hair is recommended
 - Application on stressed plants is not recommended
 - Reapply the product if necessary
