

Antialga

ALGAE AND CONTAMINATION-FREE RESERVOIRS

ALGAE FOR GREENHOUSES

COMPOSITION

Mixture of quaternaries
Sequestrants
Quaternary ammonium salts
Synergizing
Demineralised water

C.P CHARACTERISTICS

pH 6.0-9.0 +/- 0.5
Density 0.95 +/- 0.5
Color Colourless
Smell Slight
Solubility Completed

FORMULATION

Liquid

CLASSIFICATION

Danger

PACKAGING

Tank 10 L
Tank 20 L

APPLICATION

Made in Italy

Main features:

ANTIALGA is a concentrated product designed to eliminate and prevent the formation of algae on surfaces and equipment, making the environment healthier for crops. It is safe for operators, plants and structures, does not emit gases and does not cause corrosion. Ideal for use on pallets, tarps, tubs, pots and irrigation systems, it helps to maintain the efficiency and hygiene of structures.

Mechanism of action

ANTIALGA removes the algae accumulated on surfaces and plants through its direct action, preventing the proliferation of pathogens and preventing their return. Ensures effective and long-lasting cleaning, improving the health and efficiency of plants.

INSTRUCTIONS FOR USE

For the removal of algae from all surfaces in the absence of plants: apply **ANTIALGA** diluted 2-4% with water and distribute by wetting the affected surfaces well.

For the removal of algae from "flow and reflux" tanks and sub-irrigation sheets in the presence of plants, add **ANTIALGA** in relation to 60-80 ml/ m³ of watering solution. Repeat as necessary.
