

# Lube Serra

GREASE FOR THE GREENHOUSE

## SPECIAL GREASES FOR GLASSHOUSES

### Main features:

**LUBE SERRA** is a special grease for lubricating greenhouse movement components such as bearings, racks, slide guides and drive chains. Formulated to withstand adverse weather conditions, it offers high protection against corrosion, water and moisture, ensuring a long service life without loss of performance. Available in brush or spray formulations, allows precise and uniform application.

### Mechanism of action

**LUBE SERRA** forms a protective layer on the treated parts, guaranteeing continuous lubrication and resistance to wear, even under extreme conditions (-30°C to +120°C). Corrosion inhibitors protect surfaces from the elements, while special colouring allows uniform and verifiable application.

### COMPOSITION

Hydroxystearates of lithium  
Zinc oxide  
Titanium oxide

### C.P CHARACTERISTICS

pH . . . . . n.d.  
Density . . . . . 0.99+/- 0.5  
Color . . . . . Pale  
Smell . . . . . Characteristic  
Solubility . . . . . In oil

### FORMULATION

Pseudoplastic mass

### CLASSIFICATION

No one

### PACKAGING

Jar . . . . . 1 L  
Bucket . . . . . 4 L  
Bucket . . . . . 20 L  
Spray bottle . . . . . 400 ml

### APPLICATION
