

Lynfa

FOR CUT FLOWERS

MAINTENANCE FOR CUT FLOWERS

LYNFA is an innovative product specific for the good maintenance of all cut flowers.

The components of **LYNFA** allow the flowers, which are immersed after harvesting, to maintain more turgid fabrics and prolonged shelf-life of 4-5 days compared to those not treated.

Flowers, after an initial stay of at least

three hours, are ready for marketing.

LYNFA is suitable for all varieties of cut flowers, in particular for flowers with a grassy stem with a tendency to wither such as gerberas or roses.

During the warmer periods the stems will better bear the transports.

The water will tend to remain clear for prolonged periods without needing to be renewed.

COMPOSITION

Mixture of peroxides
Colloidal silver

C.P CHARACTERISTICS

pH 4.0 +/- 0.5
Density 1.05 +/- 0.5
Color Colourless
Smell Odorless
